come together each June for a week of non-stop AP essay grading. Each essay booklet is read and scored by several graders. Each grader provides a score for the individual essays. The DBQ is scored on a scale from 0 to 15, 0 being the lowest and 15 the highest. Each topic-based essay receives a score from 0 to 9. These scores are concealed so that each grader is unaware of the previous graders' assessments. When the essays have been graded completely, the scores are averaged. One score is given for each essay. So that the free response section generates three scores, the total weight of the free response section is 50 percent of the total score. Your work in the multiple choice section counts for the other 50 percent. Each year grades fluctuate slightly because the grading scale is adjusted to take into account the performance of the total AP U.S. History test taker population. When used with the corresponding chart, the scoring method we present here will strongly approximate the score you would receive if you were sitting for the actual AP U.S. History exam.

Scoring the multiple choice section:  
For the multiple choice section, use this formula to calculate your raw score:  $\text{Number Right} - \text{Number Wrong} \times 1.4$ .  
Raw score rounded to the nearest whole number.

Scoring the free response section:  
For the free response section, use this formula to calculate your raw score:  $\text{DBQ} + \text{Essay 1} + \text{Essay 2}$ .  
Raw score rounded to the nearest whole number.

You may want to give your essays three different grades, such as a 13, 10, and an 8, and then calculate your score three ways: as if you did well, average, and poorly. This will give you a safe estimate of how you will do on the actual exam. Try to be objective about grading your own essays. If possible, have a friend, teacher, or parent grade them for you. Make sure your essays follow all of the AP requirements before you assess the score. The statistical formulations used by the AP program preclude our real practice test scoring system from precisely replicating the procedures and determinations of the AP program. Bear in mind that the cut-off point between each of the five AP grades typically shifts slightly from year to year. This occurs both because one year's exam cannot be expected to be exactly as difficult as another year's and because no two test taker groups can be expected to be equally strong.

The composite score to obtain your composite score, use this method:  
 $1.3 \times \text{Multiple Choice Raw Score} + \text{Weighted Multiple Choice Score}$ . Do not round.  
 $2.73 \times \text{Free Response Raw Score} + \text{Weighted Free Response Score}$ . Do not round.

response raw score weighted free response score do not round now add the two weighted sections together and round to the nearest whole number the result is your total composite score see the range within which your score falls on this table to approximate your final grade ap grade composite score range 5 114 1804 91 1133 74 902 49 731 0 48 these overall scores are interpreted as follows 5 extremely well qualified 4 well qualified 3 qualified 2 possibly qualified and 1 no recommendation most colleges grant students who earn a 3 or better either college credit or advanced placement check with your high school s guidance office about specific requirements contacting the ap program prospective examinees should download from the college entrance examination board s website or request by phone the free bulletin offering a general description of the ap program including policies and procedures as well as instructions on how to register for the ap examination in united states history here s how to contact the college board advanced placement program dept e 22p o box 6670princeton nj 08541 6670phone 609 771 7300website collegeboard com ap
