core curriculum for gerontological nursing helps nurses prepare for the american nurses credentialing centre ancc examination for the gerontologic nurse content is based on the format of the certification exam and this new revised edition closely matches the new test plan each topic includes learning objectives outline discussion study questions answers with rationales and references a new sample exam is located in the back of the book

caring for the older adult a health promotion perspective is a concise straightforward lpn lvn textbook covering the essentials of gerontologic nursing from a strong health promotion perspective the nature of normal aging as well as disorders common to the elderly are discussed this resource also addresses concepts and issues related to promoting both physical and psychological health in an aging population the engaging easy to read informal writing style draws the reader into the subject while

conveying important information

using a caring and wellness framework this text promotes a humanistic approach to the care of older adults of diverse cultural backgrounds in all care settings the book examines and discusses the complete cross section of the lives and difficulties of the elderly and the nurses who care for them under topics such as spirituality cultural diversity sexuality polypharmacy falls and other safety issues sensory alterations immunologic concerns alzheimer s disease caregiver stress professional stress and homelessness

an additional assumption was that the processes for theory development were new to nursing and hence nurses in graduate programs learned strategies for advancing knowledge from other disciplines this assumption was debunked with the knowledge that nurses were always engaged in knowledge development driven by their experiences in clinical practice because of these assumptions most of the early writing about theory development was about outlining strategies that should be used rather than strategies that have already been used in the discipline to develop theories theorists themselves did not uncover or adequately discuss ways by which they developed their theories therefore the tendency was to describe processes that were based on theories developed in other disciplines mainly the physical and social sciences and an implicit assumption was made that there should be a single strategy for theory development some claiming to begin the process from practice and others believing it should be driven by research provided by publisher

this text guides you through the evolution of nursing s theoretical foundations and examines the ways in which these principles influence the practice of the discipline jacket

matteson mcconnell s gerontological nursing 3rd edition provides comprehensive research based information on nursing care of older adults beginning with the basics the text uses a systems approach to describe the aging process from wellness to illness it also describes physiological and psychological aspects of aging in detail as well as assessment and practice in all settings using the nursing process each chapter incorporates a research and theory based approach to the aging process content is comprehensive and focuses on caring for the older adult the text examines the differences between normal aging conditions and clinical problems conditions competencies and roles in gerontological nursing section focuses on the process that nurses especially clinical nurse specialists use to impact gerontological nursing care nursing care plans provide the practitioner with nursing care scenarios applied to clinical practice expanded content on functional assessment including addressing communication issues both verbal and non verbal alerts the reader to vital issues that may affect the patient s plan of care color insert visually complements material on the integumentary section as it illustrates some of the major integumentary conditions affecting the gerontologic population reflections boxes written by experts across different nursing fields share personal experiences related to the chapters content toward better health boxes provide key considerations for promoting healthy lifestyles assessment boxes emphasize specific physical tests and observations to make when assessing a patient age related changes boxes detail the ways in which particular body systems are affected by the aging process new chapters on end of life care evidence based practice and assisted living care give the reader a more comprehensive look at gerontological nursing care

compassionately care for the aging population with gerontologic nursing 6th edition uniquely known for its comprehensive coverage of the most common medical surgical problems associated with older adults organized by body system for easy retrieval of information it delves into health promotion and both basic and complex gerontologic concepts and issues this disorder focused gerontologic nursing text features an enhanced focus on nursing management and care coordination across health care delivery settings it emphasizes topics such as nutrition chronic illness emergency treatment patient teaching home care and end of life care and includes the latest guidelines for mammograms colonoscopies pneumonia and shingles vaccinations with the addition of new nursing theories this edition offers a valuable framework for gerontologic care overview of age related changes in structure and function included in all body system chapters the most current standards and guidelines keep you in the know psychologic and sociocultural issues and aspects of older adult care integrated throughout the text critical thinking questions included at end of chapters unique patient family teaching boxes emphasize key aspects of practice and teaching for self care health promotion illness prevention boxes provide tips to promote leading a healthy life unique nutritional consideration boxes demonstrate special nutritional needs and concerns facing the aging population evidence based practice boxes pull the critical evidence based information contained in the text into boxes for easy access and identification cultural awareness boxes highlight differences in how key concepts are understood or practiced in various cultures home care boxes highlight tips to promote practical effective home care for the older adult key points at end of chapters summarize the important concepts discussed in the chapter expanded increased focus on nursing management and care coordination across health care delivery settings new new nursing theories in chapter 2 provide a framework for gerontologic care updated up to date guidelines for mammograms colonoscopies pneumonia and shingles vaccinations updated fall prevention updates help you better protect your patients updated updates on the challenges of caring for older adults with cognitive disorders ensure you are prepared updated updated chapters throughout reflect the current evidence to guide practice

the new edition of this text has been streamlined to fit more easily into crowded nursing curricula while maintaining the breadth of coverage that made the 1st edition such a popular book leading experts in the field contributed to the book

each unit builds the fundamental concepts required to effectively treat older adults and teaches how to help them to reach their highest level of wellness regardless of their physical disorder
